

IoT Security Foundation Virtual Conference Sponsorship Guide

1 - 4 December 2020

**The World's Longest Running
Dedicated IoT Security Conference**

IoT Security Foundation Virtual Conference 2020

The World's Longest Running Dedicated IoT Security Conference

CONFERENCE AND PROCEEDINGS OVERVIEW

The **6th Annual Internet of Things Security Foundation Conference** is a four-day virtual event that takes place between Tuesday 1st and Friday 4th December 2020. The Annual IoT Security Foundation Conference has built a loyal global following from the IoT stakeholder communities and is renowned for delivering high quality conference programmes.

The era of IoT describes the world as it transforms to be ever-digital and increasingly connected. Along with the power of digital comes the reciprocal cyber threat, and we continue to witness an increasing number of attacks enabled by products that lack protection against well-known exploits, have been badly configured or suffer from poor maintenance. This causes businesses to be hesitant, concerns governments, increases the likelihood of regulation and ultimately frustrates markets.

Vendors must **build secure**, purchasers must **buy secure**, and users must **be secure**: to be without security in a digital world is not an option. Society and industry need to fight back as no one should design, buy, or use a connected product, service or system that lacks fit-for-purpose security. Yet there are no 'one-size fits all' security solutions – they are dependent on the application. Most of the attacks we see today can be effectively defended against, many by relatively simple measures. Organisations need to be informed, the solutions presented, choices made, and those choices need to be in keeping with their business context.

Welcome to the **2020 IoT Security Foundation Virtual Conference** where we aim to illuminate and educate delegates with an update on the threat landscape, standards & regulation, best practice, next-practice and the latest developments in IoT cyber security. The IoT Security Foundation Conference features talks by leading cyber security experts, training workshops and track sessions for executives, developers, engineers, managers and security professionals.

As the **World's Longest Running IoT Security Conference**, this event attracts a wide range of decision makers, including CEO's, CSO's, CTO's, Chief Security Strategists, Directors, Engineers, Software and Hardware developers, Development Managers, Technical Directors, Security Experts, Academics, Government and Press.

The conference will have a senior and expert level line up of speakers which are announced as part of the promotional activity and can be found on the conference website: <https://iotsfconference.com>

PROMOTIONAL OPPORTUNITIES

There are a number of sponsorship opportunities for organisations associated with the IoT security conference theme which will also be attended by trade and technology press.

Sponsoring *IoTSF's 2020 Conference* will deliver a number of benefits for your organisation whilst contributing to our shared mission to **build secure, buy secure and be secure**. IoTSF is committed to providing a compelling level of value for each of a limited number of conference sponsors. All of the packages that we have put together are highly competitive and have significant benefits.

Who Am I Expanding My Brand Reach To?

The IoTSF Annual Conference attracts a wide range of decision makers under one roof including CEO's, CSO's, CTO's, Chief Security Strategists, Directors, Engineers, Software and Hardware developers, Development Managers, Technical Directors, Security Experts, Academics, Government and Press.

Why Sponsor?

The IoTSF Conference provides the perfect environment to not only promote your brand, but to build lasting relationships with customers and get to know other businesses:

- **Build Reputation & Increase Brand Visibility**
- **Unique Access to our IoT Security Community and Stakeholders**
- **New Business Opportunities & Brand Exposure** - brand webpage hosted to June 2021
- **Strengthen Relationships with Existing Customers** - packages include client passes

ABOUT THE INTERNET OF THINGS SECURITY FOUNDATION (IoTSF)

IoTSF was formed as a response to existing and emerging threats in Internet of Things applications. It was launched on September 23rd 2015 in London following an intensive consultation with a wide range of stakeholder organisations including industry, academia, government, regulators and businesses seeking to use IoT technologies to drive their commercial development.

IoTSF is the global home for IoT security and the natural home for IoT product and service vendors, network providers, technology adopters, researchers and industry professionals. The mission of IoTSF is to make the Internet of Things secure, to aid its adoption and maximise its benefits. To do this IoTSF promotes knowledge and clear best practice in excellent, appropriate security to those who specify, make and use IoT products and systems.

IoTSF is an international, collaborative and vendor-neutral initiative led by industry and inclusive of all technology providers and service beneficiaries. It operates on a non-profit model.

For further information on IoTSF see our website: www.iotsecurityfoundation.org
